HEALTH BEHAVIOUR IN  
SCHOOL-AGED CHILDREN  
ÉIREANN / IRELAND

# Mental Health and Wellbeing of school-aged children in Ireland

## 10 to 17 year olds

Report that their health is excellent

Report feeling very happy with their life at present

**73%**

10 to 17 year olds report high life satisfaction

## 15 to 17 year olds

Mental Health Inventory\*

**34.66**  
out of 100

WHO Well-being Index†

**50.54**  
out of 100

\*Mental Health Inventory – a higher score means greater mental health problems with 100 indicating that these problems were present at all time during the last month.

†WHO Well-being Index – 0 indicates a total lack of wellbeing while 100 means that these dimensions were present at all times during the last two weeks
