## 1BA Geography Module Outlines 2025/2026

**Module:** TI 151 Principles of Physical Geography

**Coordinator:** Dr Gordon Bromley, Dr Eugene Farrell, Dr Chaosheng Zhang

This course is designed to provide insight and understanding to the fundamental concepts and principles of physical geography as an academic discipline. In doing this, the course explores how the physical environment functions; how different environmental systems interact and how the physical environment impacts on human activities. The course explores the various components that make up these environmental systems, such as the biosphere, atmosphere, hydrosphere and geosphere. In addition the course also provides some understanding of how these fundamentals apply to Ireland and in so doing gives an insight into the richness of the physical geography of Ireland. Major Themes covered in TI 151: The Biosphere: Biogeography – species distribution and ecosystems, The Atmosphere: Weather and Climate, The Hydrosphere: Rivers The Geosphere: Coasts

---

**Module:** TI 150 Principles of Human Geography

**Coordinator:** Professor Frances Fahy, Dr Kathy Reilly, Dr Elaine Williams

This course seeks to introduce key problems, concepts and contexts within human geography. Its focus is a contemporary one: it strives to illuminate the world of today by exploring and analysing the origin of central issues that make the headlines (or not) in the media and beyond. The course places lectures alongside the information given in the textbook; for examination purposes, both are essential. Major Themes covered in TI 150 (subject to change depending on staff availability) Rural Geographies, Cultural Geographies, Environment and Society, Social Geographies, Economic Geographies, Political Geographies, Development Geographies, Urban Geographies.

---

**Module:** TI 1100 and TI 1101 Geography in Practice (GiA)

**Coordinator:** TBC

This module introduces first year geography students to a range of skill-based exercises designed to enhance their learning experience and develop their research competences. Supported by on-line lectures and class-based tutorials, students undertake a series of exercises on referencing, academic writing, mapping, data analysis and fieldwork that will reinforce the skills geographers use every day. Further information on each exercise and submission dates is available in the TI1100/TI1101 handbook on Blackboard.
