PhD Scholarship Advertisement

Fully Funded PhD in Wireless Implantable Sensing Systems at Smart Sensors Lab

School of Medicine, College of Medicine, Nursing and Health Sciences, University of Galway

Application(s) are invited from suitably qualified candidates for full-time funded PhD scholarship(s) starting in June, 2023 affiliated to the School of Medicine at the University of Galway.

University of Galway
Located in the vibrant cultural city of Galway in the west of Ireland, the University of Galway has a distinguished reputation for teaching and research excellence

For information on moving to Ireland please see www.euraxess.ie

Detailed Project Description: The PhD project will focus on the development of a wearable device to measure blood pressure from a wireless implantable sensor for patients with hypertension. Hypertension is considered a major cause of death from cardiovascular disease. Accurate monitoring of blood pressure results in better control of blood pressure, which can significantly reduce the risk of death due to hypertension. The development of an accurate blood pressure sensor and a wearable reader device is required for reliable blood pressure measurement for clinical use. The PhD research will address the critical challenges of sensor linkage with the external wearable device, extension in detectable range, and miniaturisation of the reader device. This will require the development of an embedded system on a flexible PCB and sensor data processing algorithms to meet the design requirements of the wearable reader device.

Living allowance (Stipend): €18,500 per annum, [tax-exempt scholarship award]

University fees: €5,500

Start date: June 2023

Academic Entry Requirements: Applicants should ideally possess a Masters degree or a BS(hon) or BE with relevant experience in Electronic/Computer Engineering or a closely related discipline with a strong background in analogue/digital electronics, RF front-end design, analogue/digital IC design, and microprocessor/FPGA-based embedded systems. Additional requirements include:
• Experience in Verilog/ VHDL, Python, and C coding.
• Knowledge/experience of integrated circuit design, simulation, and verification analysis and familiarity with related software (e.g., Cadence Virtuoso System Design, Cadence Analog (RF) etc.)
• Problem-solving, critical thinking and troubleshooting skills
• Excellent written and oral communication skills.

**To Apply for the Scholarship:** The PhD position is supported by the Horizon RIA grant

**Contact Name:** Dr Riaz Rehman

**Contact Email:** riaz.rehman@universityofgalway.ie

**Application Deadline:** 03/05/2023 and time 17:00 GMT
To advertise on findaphd.com please select subject areas from the list below.
You can select a maximum of 10. Please remove other options.

FindaPhD Disciplines & Subject areas

Agriculture
☐ agricultural sciences
☐ agricultural technology
☐ arable farming
☐ livestock farming
☐ forestry & arboriculture
☐ other

Anthropology
☐ biological anthropology
☐ social anthropology
